Webinar
STICS Training course
March 11-12-13 & 21-22, 2024

CERTIFICATE

This is to certify that

Oriane BRAUD

Attended a webinar course organized by INRAE on:

Crop Modeling with the STICS soil-crop model

During the period: 11-12-13 and 21-22 March 2024 (duration: 33 hours)

Samuel BUIS,
Co-Coordinator of the STICS Project Team
INRAE / UMR EMMAH
228 route de l'Aérodrome, 84000
Avignon
France

training session program (March 2024)

Course and support will be held in French or in English. *Time in CEST.*

Monday 11 March
9h00-9h30: Welcome and introduction
9h30-10h30: STICS overview
10h30 Coffee time
10h45-12h45: Soil processes formalisms
Lunch
14h15-16h00: Practical work 1: JavaSTICS interface
16h00 Coffee time
16h15-17h15: Practical work 1: JavaSTICS interface
17h15-17h30: Debriefing of the day

Tuesday 12 March
9h00-10h30: Crop growth and development (part I)
10h30 Coffee time
10h45-12h15: Crop growth and development (part II)
Lunch
14h00-16h00: Practical work 2: Effect of cultural practices, soil and climate on the model outputs
16h00 Coffee time
16h15-17h15: Presentation of homework
17h15-17h30: Debriefing of the first 2-day sessions

Wednesday 13 March (for those who registered)
9h00-9h45: R packages for STICS
9h45 Coffee time
10h00-12h15: Practical work: Using STICS R packages for simulation, evaluation and calibration
Lunch
14h00-15h00: STICS Intercrop
15h00 Coffee time
15h15-17h00: STICS Intercrop

Thursday 21 March
9h00-10h15: Debriefing of homework
10h15 Coffee time and photo
10h30-12h15: Specificities of perennial crops and crop rotations
Lunch
14h00-15h30: Practical work 3: Simulation of crop rotations including perennial crop with the STICS model
15h30 Coffee time
15h45-17h00: Practical work 3: Simulation of crop rotations including perennial crop with the STICS model
17h00-17h15: Debriefing of the day

Friday 22 March
9h00-10h30: Model evaluation and calibration: principles and existing tools
10h30 Coffee time
10h45-12h15: Practical work 4: Integration of observed data and example of parameter calibration
Lunch
14h00-15h00: Practical work 4: Integration of observed data and example of parameter calibration
15h00 Coffee time
15h15-16h15: Presentations of homework results by groups of students
16h15-17h15: Debriefing of the STICS course & Evaluation of the webinar
